	Basis of the opinion
1.	With regard to the elements of the international application:*
	the international application as originally filed
	the description:
	as originally filed
	pages 1-51 , as of the demand pages NONE , filed with the demand filed with the letter of
	pages NONE, filed with the letter of
	the claims:
	pages 52-67, as originally filed
l	NONE as amended (together with any statement) under
	pages NONE, filed with the demand  pages NONE, filed with the letter of
	pages NONE , filed with the letter of
	the drawings:
	as originally filed
	pages NONE, filed with the demand pages NONE, filed with the letter of
	pages NONE, filed with the letter of
l	the sequence listing part of the description:
	as originally filed
1	pages NONE , filed with the definance
	pages NONE, filed with the letter of
1:	2. With regard to the language, all the elements marked above were available of realizable of realiz
	language in which the international application was filed, unless office wise indicated which is:  These elements were available or furnished to this Authority in the following language which is:  These elements were available or furnished to this Authority in the following language which is:
	These elements were available of furnished to discover the purposes of international search (under Rule23.1(b)).  the language of a translation furnished for the purposes of international search (under Rule23.1(b)).
}	the language of a translation turnished for the purposes of internation (under Rule 48.3(b)).
	the language of a translation terminational application (under Rule 48.3(b)).  the language of publication of the international application (under Rules are language of publication (under Rules).
	the language of publication of the international application (under Rules the language of the translation furnished for the purposes of international preliminary examination (under Rules
1	55.2 and/or 55.3).  3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the written
1	opinion was drawn on the basis of the sequence hours.
-	contained in the international application in printed form.
	filed together with the international application in computer readable form.
- [	furnished subsequently to this Authority in written form.
-	== computer readable 10111.
-	The statement that the subsequently furnished written sequence listing does not go object.
	international application as filed has been furnished.
	international application as filed has been furnished.  The statement that the information recorded in computer readable form is identical to the written sequence listing
	has been furnished.
	4. The amendments have resulted in the cancellation of:
	the description, pages NONE
	the claims, Nos. NONE
	Land Fig. NONE
	the same of the amendments had not been made, since they have been considered to go
	* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to it this opinion as "originally filed."

# VIII. Certain observations on the international application

WRITTEN OPINION

The following observations on the clarity of the claims, description, and drawings or on the questions whether the claims are fully supported by the description, are made:

Claims 26-28 are objected to as lacking clarity under PCT Rule 66.2(a)(v) because claim26 is not fully supported by the description. The description does not disclose the claimed invention in a manner sufficiently clear and complete for the claimed invention to be carried out by a person skilled in the art because: transgenic animals, other than mice, cannot be made by homologous recombination. Homologous recombination occurs in ES cells, of which, only mice is the only species in which ES cells have been cultured.
